

Mecal by Starn

Applicator Order Sample Requirements:

If ordering an applicator from MBS, we will need samples to design, build, and test your applicator prior to shipping. Please advise tracking on the samples to jfriedrich@starn.com once it is available. Please send them to attention of Josh Friedrich at our 20524 Blooming Valley Rd Meadville, PA 16335 location.

The lead time depends on when we receive the samples and setup form. In the email with the quote there is an example image of how the packaging for the samples should be handled to keep them from being damaged in transit. Keep samples separate between applicators, even if they are using the same wire. This prevents confusion and delays during processing.

To speed up sample processing, we are asking for a physical copy of the setup form to be included in with samples packaging. Please follow the link for the setup form. <https://www.mecalbystarn.com/wp-content/uploads/2019/11/Applicator-Setup-Form-2019.pdf>

IMPORTANT:

- **We need the customer area on this form completely filled out for EACH applicator prior to starting the order.**
- **Also, please reference the P.O. and/or Quote on the box of samples.**
- **Please send 150 of each terminal and 10ft of each size wire.**
- **Please reference quote number on the P.O.**

Thank you!
